

Certified Builder Program

Construction Integrity for Customer Longevity

Reduced Construction Time with Less Trades Result in Improved Project Scheduling, Fixed Costs and a Quicker Turn to Cash

Deliver Customer Value

Trinity's certification program represents our commitment to deliver the best product in building technology available with trained and certified partners resulting in total customer satisfaction and increased product performance. Our Leading edge technology enables this select team to provide homeowners with a high quality, energy efficient home at a competitive price.

Consistent delivery of IPP® products (Integrated Post and Panel), will allow certified professionals to build it right the first time, without error or waste, considering time, safety, production costs and the energy saving benefits of the IPP system. These features combined with a cooperative marketing plan establish a competitive edge for each certified builder.

Accountable Partnership

Basic criteria to become a certified builder are as follows:

- 1.1 Be a licensed residential builder within your local jurisdiction (example Home Owner Protection in B.C.)
- 1.2 Be a registered company in good standing within your jurisdiction and hold a current business licence.
- 1.3 Proof of documentation for liability and construction insurance and bondable
- 1.4 Be current with local safety and Workers Compensation boards
- 1.5 Be current with all BC Government and Federal Government agencies, statutes, governing acts and regulations
- 1.6 Carry a New Home Warranty Policy with a registered provider (Travellers etc.)
- 1.7 Completion of the Certified Builder Application along with your company outline as described below

Trinity Post and Panel Inc. will work closely with IPP certified builders;

- 2.0 On-site training and supervision of safety and installation procedures
- 2.1 Inclusion of your contact information and logo on our website certified builder list
- 2.2 Re-Direct customer inquiries to you for your preferred areas of service.
- 2.3 Photograph construction of the IPP system to develop training and marketing materials
- 2.4 Provide updates and first exposure to new technology and eco friendly statistics relative to IPP's system
- 2.5 Cooperative participation in advertising efforts, grand openings, press releases, etc.
- 2.6 Provide documentation and technical statistics for Leeds or Energy Star programs
